Recording tips

- **Record each line as a separate take** (or leave a 2-second gap between lines) so the editor can drop each one on its timecode.
- **Watch the guide video first** (hbmun-v3-guide.mp4). It has a robot guide voice placed at the right spots. Match the timing, not the robotic tone.
- The “slot” column is the time before the next line starts. Every line fits comfortably at a natural speaking pace, so there's no need to rush.
- Record in a quiet, soft room (a wardrobe full of clothes works great). Phone 15–20 cm from your mouth, slightly to the side. Use voice memos and send the original file (WAV or M4A, not a WhatsApp voice note).
- Energy: smile while you talk — it shows. Lean into the Marvel reveal (line 13) and whisper the top-secret line (16).
- Pronunciation: HBMUN = “H-B-MUN”, ACDs = “A-C-Ds”, hbmun.info = “H-B-MUN dot info”.
